Platform Overview

UnicoOS (developed by E1 Unico Corporation) is an all-in-one Business Operating System designed exclusively for small-to-medium-sized businesses (SMBs) and burgeoning entrepreneurs. Our platform serves as the centralized digital hub where business owners actively manage their daily operations — including bookkeeping, CRM pipelines, invoicing, inventory tracking, employee time-tracking, and financial funding preparation (such as SBA 504 and 7(a) commercial loan structuring).

SMB

Exclusive Focus — Small & Medium Businesses

30+

Integrated Business Modules

TX+

Texas-First, Scaling Nationally

Audience & Demographics

Segment	Description
Primary Users	Small business owners, startup founders, B2B contractors, and retail/service operators

Geographic Focus	Heavy regional concentration across Texas and South Texas market, scaling nationally
Intent Type	High-intent commercial users actively seeking tools to scale operations, acquire commercial real estate, optimize payroll, and access business capital
Business Stage	Pre-revenue startups through established SMBs with \$50K–\$5M+ annual revenue
Industries	Industrial services, plant operations, food & beverage, retail, professional services, construction, and transportation

Affiliate Strategy & Business Goals

UnicoOS integrates premium financial services, insurance carriers, and business software recommendations directly into our marketplace workflows. Our goal is to connect our active database of business owners with industry-leading third-party providers that streamline their path to commercial growth.

We are looking to establish long-term partnerships with high-performing brands in the following categories:

Commercial Lending & Financing

Direct match loops for business loans, lines of credit, and corporate financial tools. Our users are actively preparing SBA 504 and 7(a) loan applications through UnicoOS financial modules.

Business Deposits & B2B Banking

Merchant checking accounts, savings products, and secure payment processing (ACH/wire management). Our banking module is Plaid-integrated for live account data.

Corporate Credit Cards

Bookkeeping-compatible corporate expense cards and financing instruments that connect directly to our UniBook accounting module.

Commercial Insurance

B2B insurance providers, workers' comp solutions, and operational liability coverage — integrated into our dedicated Insurance CRM module for quote comparison and policy management.

Why Partner With UnicoOS?

Unlike standard content sites or coupon networks, UnicoOS captures users inside a **high-trust software ecosystem**. When our merchants look for a loan provider, a business card, or a corporate bank account, they look to our software's verified data modules to find their ideal fit. Partnering with us grants your brand **direct exposure to motivated business entities at the exact moment they are looking to allocate budget and deploy capital**.

- **In-context placement:** Affiliate offers surface within the relevant module — banking offers in the Banking module, insurance offers in the Insurance module
- **High commercial intent:** Users are actively running businesses, not browsing casually
- **Trusted ecosystem:** BBB Accredited platform with SOC 2 infrastructure — users trust our recommendations

- **Texas market concentration:** Strong regional density with a growing national footprint
- **Multi-business reach:** E1 Unico Corporation operates UnicoOS plus Industrial Drip LLC, Ultra Plant Services, and Feast and Fun LLC — cross-promotional opportunities

Platform Modules (Affiliate Placement Opportunities)
